# PeopleLink

PeopleLink

Solution Brief

for CMS & Lecture Capture in the Enterprise Sector

The challenge in recording training sessions for live or later distribution and remote viewing. This necessitates having in place hardware and software that can reliably and cleanly capture such information and stream it.

The Issue

The need to have a centralized depository of content that has already been generated.

The need to have a learning management system (LMS).

The PeopleLink Solution

The PeopleLink Solution: PeopleLink Hardware:
- High End Digital Classroom & Virtual Classroom Setup.
- Lock & Track Camera focusing on Teacher; PTZ on Students.
- One Visualizer on Podium for showing Live Book Content.
- PeopleLink's Lecture Capture Solution Supports multiple Cameras enabling lecture recording. Inbuilt Digital WhiteBoard, and sharing of presentation, desktop, and media.

PeopleLink Acumen: Standardize teaching delivery
- Central content repository.
- Control pedagogy & create courses.
- Offer learners video lessons & course subscriptions.
- Manage content delivery, assessments, & more.
- Ensure lesson plans are followed & syllabus is completed.

What are Your Needs:

The ability to capture training sessions for archiving and later distribution.

Give trainers and trainees the tools to readily and remotely access content.

Enable efficient knowledge transfer?
